Experiment-2

Tasks

Task1: Project Setup & Introduction

- Create a project folder named company_landing_page
- Inside the folder, create: ○ index.html ○ style.css
- Add header comments in HTML(project title, name, date)
- Create an introduction section with company name and tagline

Deliverable:
Project folder with HTML and CSS files linked correctly.

Task2: HTML Structure–Page Sections

- Create the following sections using semantic HTML:
  - Header /Hero section ○ About / Introduction ○ Services ○ Testimonials ○ Contact Information
- Use tags such as:
  - <header>,<section>,<footer>

Deliverable:
Well- structured HTML page with all required sections.

Task3: Styling with CSS

- Apply CSS styling for:
  - Page layout and spacing ○ Background colors and fonts ○ Section alignment and borders
- Use:
  - Class and ID selectors ○ Box model properties(margin, padding)

Deliverable: style.css file with consistent and professional styling.

Task4: Services Section Design

- Add at least 3 services offered by the fictitious company
- Include:
    - Service name
    - Short description
- Use cards, lists, or grid-style layouts

Deliverable:
Services section clearly displayed and styled.

Task5: Testimonials Section

- Add at least 2 customer testimonials including:
    - Customer name
    - Short feedback
- Style testimonials for readability and emphasis

Deliverable:
Neatly formatted testimonials section.

Task6 (Bonus): Contact Form

- Add a contact section with:
    - Address/Email/Phone
    - Simple contact form(Name, Email, Message)
- No backend required(UI only)

Deliverable:
Contact information and form displayed correctly.
